

engaging lessons and professional support

CMA Saturday Workshop

21st March 2020
9.00am – 4.00pm
ACU Canberra Campus

Charlie Lovitt
presents

Hands-on Problem Solving - Continuing the Journey with Maths300

**THIS WORKSHOP IS REGISTERED WITH TQI AND WILL PROVIDE
5 HOURS ACCREDITED PROFESSIONAL LEARNING**

This workshop will provide a very hands-on experience for teachers who will have direct access to the Maths300 resources developed by Charles Lovitt. Exploring these ready-to-use tasks will give teachers a first hand experience with some very practical and purposeful maths activities that they can implement in their own classrooms. A particular feature of the selected tasks is their openness, having multiple entry and exit points or multiple levels of success, meeting the mixed ability range in all classrooms.

Maths300 shows how to turn maths lessons into rich and balanced programs that can supplement the work already being done in schools. Maths300 is not a text-book based resource but is a catalogue of interesting maths lessons taken from classrooms all around Australia. They are presented in a way that focuses just as much on teacher learning as it does on student learning.

Charles Lovitt is a well known and respected Australian maths educator. He is an experienced and talented presenter with an international reputation in teacher professional development. He works extensively throughout Australasia and the United States. Charles is the author of the Maths 300 resource and the Maths Task Centres.

Cost: - CMA members \$80; Non-members \$100; morning tea, lunch and afternoon tea provided
