

CANBERRA MATHEMATICAL ASSOCIATION PRESENTS

23.5.18

MATHS300 WORKSHOP

Maths 300 - the best 300 maths lessons in Australia

Join us at the **Hedley Beare Centre for Teaching and Learning** on **Wednesday 23rd May** from 4.30 to 6.30pm when we will be exploring the fabulous Maths300 resources. These lessons are fantastic examples of great lessons that are practical and engaging, yet still maintain a depth of mathematical content and provide a challenge for students of all abilities.

Our workshop will be led by well-respected Canberra teacher and CMA Vice President Bruce Ferrington, who will lead us in exploring lots of the richness of the Maths300 tasks.

So if you are a teacher from early childhood to tertiary looking for some great maths activities for your class, or if you are a teacher simply looking to engage with an enthusiastic group of professional colleagues, please come along and have a memorable experience.
